To Whom it May Concern,

I highly recommend the work of Davis Constructors & Engineers, Inc. Davis was hired to build a new wing onto the Anchorage Museum. The \$24 million project added 25,000 sf of new space to the existing facility. From start to finish, Davis was honest, cooperative, and conscientious in all facets of its work.

The company's management was responsive in supplying submittals, pricing, and other administrative documentation, and the project was completed both on schedule and on budget. I was thrilled with the finished project and would not hesitate to work with Davis Constructors in the future.

Please feel free to reach out if you would like to discuss in more detail or if you have any additional questions.
