Attn: To Whom It May Concern

Re: Davis Constructors & Engineers, Inc. (Davis)
Letter of Recommendation

Design Alaska has been a partner with Davis on several projects and we appreciate the dedication to their projects, including the following:

- F-22 Squadron Operations and Maintenance Hangar 2006
- Fairbanks International Airport 2008
- C Street and International Office Building 2013
- CIRI Fireweed Office Building 2015
- University of Alaska Fairbanks Power Plant 2014 - present
- Clear Long Range Discriminating Radar 2018 - present

We appreciate the hands on approach that Davis takes to understanding the owner's goals. Davis's consistent attention to detail allows them to go to the root of each challenge to define the issues at hand so they can be clearly understood. Davis provides extensive schedule and cost tracking on their work, and can be trusted to provide accurate information. They communicate well with sub-contractors and manage the entire site to the benefit of the final product. They are a dependable and reliable contractor with leadership and management skills to develop any custom project needs a client may require.

I would recommend Davis to any organization. They have provided constructability leadership on every project we have worked with them on. They truly understand what it takes to maintain a successful relationship with their customers. If you should require additional information with regard to their performance, please feel free to contact me.

Sincerely,

Design Alaska, Inc.
